This issue

- Mathematicians of the Day
- Today's Editor: Dr. Collins

Mathematicians of the Day

GSS-Math 2006: Nabeela Vikas Elsa Yizhen Thomas Amal Jae Jill
Joey Rachel Lisa Ira Ian Rohit Sean Casey Jose Chris Shawn Will
Safwan Elizabeth Helen Shannon John Xinzhu

They spent 5 week studying, loving and hating linear algebra; burning up on the walk up the Hill to Ayres and then being blasted by the AC; trying to stay awake as Dr. Collins attempts to amaze them with the power of mathematics; learning the mysteries of MATLAB, Gould Indices, Markov Chains, etc. in the computer lab; having 'a little part of themselves die' from Exam 3 (and Exam 4?); playing ridiculous games to earn the World Cup Math Championship; and, hopefully, learning a bit about their capabilities and a bit about mathematics.

All have been challenged and all have responded. They worked hard and have nothing but a bright future ahead in whatever direction they choose to go. It's possible that a future 'Mathematician of the Day' is a part of this class. Good luck to all!

Today: 2 Project Presentations, Return Exam 4, Food, Evaluations, Final World Cup Event, Awards & Party
