Office: Ayres 331

Calculator: A scientific calculator is required for the course. It doesn’t matter much which one, just as long as you know how to use it.

Office hours: Monday 11:30-12:30 in my office; Thursday 7-8 pm at Golden Roast coffeehouse on Melrose down the hill from the library. Also by appointment. Please give me 24 hours advance notice if you are making an appointment.

Homework: (30% of grade) Each Friday homework is due at the beginning of class. No late homeworks are accepted. The lowest two homework grades will be dropped to allow for extenuating circumstances that may occur during the semester. There are no exceptions! Because the homework is such a large percentage of your grade, it pays to take the time to do it well!

Exams: There will be three hour exams during the semester. Each of these is worth 16% or 17% of your grade. The final is worth 20%, and is scheduled for May 2, 5-7pm.

Problem solving days: Each Thursday is a “problem solving day,” where we will help each other solve problems. This is a good day to discuss homework related questions.

Academic Honesty: Familiarize yourself with the University’s expectations for academic honesty as described in Hilltopics. Violations of these policies may result in suspension from the class, an F on the assignment, or an F in the course. Additionally, the matter may be referred to the Academic Review Board for further action; this may result in exclusion from the University. If you have any doubts, err on the side of caution.

Disabilities: If you need course adaptations or accommodations because of a documented disability, please contact the Office of Disability Services at 191 Hoskins Library at 974-6087. This will ensure that you are properly registered for services.
