• Your instructor has uploaded the roster from Blackboard to WebAssign. Your account has already been created. You do not need to create an account. **There is no class key for this course.**

• The easiest way to log in to WebAssign is via the WebAssign button on your Bb course site. The Math Dept. recommends that you use Mozilla Firefox as your browser for optimal compatibility with Blackboard and WebAssign.

• If you are unable to log in to WebAssign via Bb (or you want to use another browser such as Safari), you may access WebAssign directly via webassign.net. **BUT, you'll have to jump through a couple of hoops first:**
  
  - Go to webassign.net and click on the "Forgot your username?" link.
  - You will be asked to enter your email address. Your WebAssign account is associated with your UT email address in this form: UTNetID@tennessee.edu.
  - Check your UT email to get your username and institution code. (It will be something like UTnetID:app-69. The institution code is utk.)
  - Use the Reset Password link at the bottom of the email to reset your password so that you will be able to log in directly via the WebAssign home page rather than via Bb.

If you need technical help with WebAssign, contact WebAssign. Your instructor does not know the particulars of your computer, but WebAssign has many help options. The best place to start is by clicking the Student Support link which appears in the top right corner of the WebAssign home page (webassign.net). There you will find links to quick start guides, online help, email support, tech support phone number and hours, etc.

**Check this out today by going to WebAssign.net.**
